31 January 2024 - Book Now for
AICC(WA)'s Annual Geopolitical Address by
Mr Greg Copley AM

President, The International Strategic Studies Association, Washington DC, USA

"Australian Denialism is No Answer to Global Realities"

Australians know that all is not right with the world, but, as long as many of us are comfortable, we do little to shore up the security and welfare of the country. We are more divided as a nation than ever. Indeed, can we even call ourselves "a nation" when we continually decry national identity, national purpose, and national responsibilities? We now know what we have been told for years was coming: the China economic boom is over. The world is again in the throes of conflict and chaos. We saw, with the recent referendum process, that the preference voting system which elects governments does not represent the national will in the same way that direct referenda do. And we saw, with the covid crisis and the HAMAS war against Israel, that Australians have lost the sense of mutual trust and

mateship they once took for granted; we divide, we react based on ignorance rather than knowledge, and we think neither of the past nor the future.

Join us to hear Gregory Copley, in his annual Geopolitical address, give us perspectives which can provide reason for hope, discussion, and renewed trust. But with some sobering realities thrown in.
